DECLARES

that its article

- FLAG96113BM

is designed and produced in Italy. It meets the main European technical requirements and the good rules for the protection of human health. It also meets the applicable technical requirements governed by the following standards:

- EN 817 - *Sanitary tapware - Mechanical mixing valves - General technical specifications*
- EN 1717 - *Protection against pollution of potable water installation and general requirement of devices to prevent pollution by backflow*
- EN 248 - *Sanitary tapware - General specification for electrodeposited coating of Ni-Cr*
- DM 174 - *Regolamento per i materiali utilizzati per la distribuzione dell'acqua potabile*
- ACS - *Attestation de Conformité Sanitaire*
- UBA - *Liste der trinkwasserhygienisch*
- KTW Bewertungsgrundlagen - *(Übergangsregelung KTW-BWGL)*

All the materials in contact with water comply with the main European regulations applicable to sanitary tapware.

Notes for the "Regulation for building materials EU 305/2011":

The European Parliament has not yet implemented the harmonized standards for sanitary taps, therefore manufacturers are not currently allowed to mark their articles with the CE marking.
